

AUSTRALIAN RAIL TRACK CORPORATION LTD  
**Southern Sydney Freight Line**

**IMPORTANT COMMUNITY INFORMATION  
CONSTRUCTION OF MINTO STATION**

Australian Rail Track Corporation (ARTC) has commenced works at Minto Station. These works form part of the construction of the Southern Sydney Freight Line (SSFL), an initiative by ARTC to improve the efficiency and competitiveness of rail freight services. This will increase the use of rail for freight and is better for the environment as rail services have less impact than trucks. The SSFL is a 36 kilometre dedicated freight line between Macarthur and Sefton and the new track is within the existing rail corridor. The SSFL will allow passenger and freight services to operate independently, freeing up passenger lines for improved services.

Construction of the new carparking is progressing and will be opened to the public as soon as possible.

Construction works at the station proper will shortly commence. These works involve the construction of 3 new passenger lifts to improve access, the extension of the existing footbridge and the demolition of the existing western ramp. The current western stairs will be replaced with a new set of stairs. The new bus shelters have already been opened to the public.

During construction there will be some changes to public access to the station to allow the lift construction to begin. Pedestrian access to the station will be maintained.

We apologise for any inconvenience caused during the execution of this work. Completion of this work will increase the number of station parking spots, as well as increase the comfort and accessibility commuting to the station. This upgrade will greatly benefit the local community and make it easier to use public transport.

We appreciate everyone's patience and understanding while we build this important project.
