

AUSTRALIAN RAIL TRACK CORPORATION LTD
Southern Sydney Freight Line

**IMPORTANT COMMUNITY INFORMATION
WORK COMMENCES ON MINTO STATION UPGRADE**

Australian Rail Track Corporation (ARTC) will be commencing work on the Easy Access upgrade at Minto Station shortly. Minto Station is to undergo an upgrade to make train travel from this station more accessible for customers.

Features of the upgrade include:

- New station entry stairs on western side
- Three new lifts
- Extension of existing footbridge over Southern Sydney Freight Line
- Reconstruction of the existing stairs to Platform 1
- New ticket office on Platform 1
- Upgraded CCTV and signage.

Please be aware that there will be a presence of construction workers and building equipment at Minto Station. We apologise for any inconvenience caused during the execution of this work. Completion of this work will increase the safety, comfort and accessibility at the station. This upgrade will greatly benefit the local community and make it easier for families and seniors to use public transport.

These works form part of the construction of the Southern Sydney Freight Line (SSFL), an initiative by ARTC to improve the efficiency and competitiveness of rail freight services. This will increase the use of rail for freight and is better for the environment as rail services have less impact than trucks. The SSFL is a 36 kilometre dedicated freight line between Macarthur and Sefton and the new track is within the existing rail corridor. The SSFL will allow passenger and freight services to operate independently, freeing up passenger lines for improved services.

We appreciate everyone's patience and understanding while we build this important project.
