

AUSTRALIAN RAIL TRACK CORPORATION LTD
Southern Sydney Freight Line

**IMPORTANT COMMUNITY INFORMATION
WORK COMMENCES ON SEFTON STATION UPGRADE**

Australian Rail Track Corporation (ARTC) will be commencing work on the Easy Access upgrade at Sefton Station shortly. Sefton Station is to undergo an upgrade to make train travel from this station more accessible for customers.

Features of the upgrade include:

- Upgraded southern side stairs
- Three new lifts
- New family accessible toilet
- Upgraded CCTV and signage

Please be aware that there will be a presence of construction workers and building equipment at Sefton Station. We apologise for any inconvenience caused during the execution of this work. Completion of this work will increase the safety, comfort and accessibility at the station. This upgrade will greatly benefit the local community and make it easier for families and seniors to use public transport.

For the duration of these works the bus stop will be relocated from Wellington Road to Helen Street, this will be sign posted.

These works form part of the construction of the Southern Sydney Freight Line (SSFL), an initiative by ARTC to improve the efficiency and competitiveness of rail freight services. This will increase the use of rail for freight and is better for the environment as rail services have less impact than trucks. The SSFL is a 36 kilometre dedicated freight line between Macarthur and Sefton and the new track is within the existing rail corridor. The SSFL will allow passenger and freight services to operate independently, freeing up passenger lines for improved services.

We appreciate everyone's patience and understanding while we build this important project.
