IMPORTANT COMMUNITY INFORMATION

INTEGRAL ENERGY RELOCATION, LIGHTHORSE PARK LIVERPOOL

Australian Rail Track Corporation (ARTC) will be undertaking work in Lighthorse Park, Liverpool for the Southern Sydney Freight Line Project. The works will include the relocation and replacement of trees within the park in addition to the instillation of two new Integral Energy poles. The tree replacement will be occurring from the 4th January until 25 January 2010 with three trees replacing every tree removed. The construction work will take place from the 14 to the 25 January. The works will be undertaken from 7am to 5pm. The existing play equipment within the reserve will not be affected by the works. The equipment on site will include a pole auger truck, tip truck, earthing electrodes and hand tools. ARTC will ensure that if the park is disturbed in any way it will be reinstated to its original state.

This relocation is required as part of the enabling works to facilitate the construction of the Southern Sydney Freight Line, a 36 kilometre dedicated freight line between Macarthur and Sefton. The SSFL will allow passenger and freight services to operate independently, freeing up passenger lines for improved services and providing more capacity for freight trains on the dedicated lines.

We appreciate everyone's patience while we build this important project for Sydney, NSW and the nation.
