IMPORTANT COMMUNITY INFORMATION

Minto Station Works – Update

Australian Rail Track Corporation (ARTC) has been carrying out construction works at Minto Station. These works involve the construction of 3 new passenger lifts to improve access, the extension of the existing footbridge and the demolition of the existing western ramp. The current western stairs will be replaced with a new set of stairs. The new bus shelters have already been opened to the public on the SSFL side.

On the 29th March 2010 works will begin on the installation of the lifts. This will require some disruption to the pedestrian/commuter movements at the station on 30th March 2010. All pedestrian movements will be managed by a traffic controller on the 30th March between 9.00am and 2.00pm and access will be maintained in a stop/flow situation and there will be no impact to train travel during this day. Please be aware there will be short delays experienced through out the above times.

The ramp access at Minto will be maintained temporarily until the lifts are installed and functioning.

We appreciate everyone's patience while we build this important project.
