

AUSTRALIAN RAIL TRACK CORPORATION LTD
Southern Sydney Freight Line

Integral Energy Relocation, Longfield Street and McBurney Road, Cabramatta

Australian Rail Track Corporation (ARTC) will be carrying out the installation of Integral Energy 11kv feeders. This will replace the existing Integral Energy asset that is in the way of the new Southern Sydney Freight Line. The works include an underbore beneath the railway line as well as local excavation and trenching to connect to the existing joint bays. There will also be potholing works and excavation for soil samples in this area.

These works will begin on 8th June 2010 and will continue at this location for approximately 8 weeks. There will be traffic impacts due to these works and traffic controllers will be in place to manage the local traffic and pedestrian movements. The equipment onsite will be boring machine, excavator, cable truck, jack hammer, concrete mixer, work vehicles and hand tools.

These works form part of the construction of the Southern Sydney Freight Line (SSFL). We appreciate everyone's patience while we build this important project.
