Southern Sydney Freight Line

IMPORTANT COMMUNITY INFORMATION

Cooper Road Overbridge – Weekend Works

Australian Rail Track Corporation (ARTC) will be undertaking piling works on Cooper Road Bridge at Sefton over the weekend of the 20th and 21st October 2010. The works will take place from 6am to 6pm (with a 6pm to 7pm contingency). The works can only be undertaken during a weekend track possession due to the proximity of works to overhead wires and trains. Works to take place include: Installation of piling platform, survey set out, bored piles to be installed in the up and down cess immediately under the bridge. Work will take place underneath the main span where the proposed Southern Sydney Freight Line (SSFL) will be situated. Equipment to be used include: 20T Piling Rig, Dump Truck with rubber tyres, 5T Mini Excavator, 12T Excavator, 12T Tipper, Concrete Boom Pump, Lighting Towers x 2 and Hand Tools.

We appreciate everyone's patience while we build this important project for Sydney, NSW and the nation.
